- **references activity of assembling products for third parties:** Criocabin, From Lighting, GIVAS, Semaforica.

PRESENTING FOOD IN THE RIGHT WAY

Our LED lighting are flexible and designed specially to meet the demands of retail sector.

We develop smart solutions, perfectly tailored to specific tasks, contexts, and purposes.

In the refrigeration and food sector, **we have solutions for shelves, displays, fresh-food counters, and refrigerated cabinets.**

Our products includes different light distribution as well as **white and special light colours for meat, cheese, bread, vegetables, fruits, pastry, and fish.**

The perfect light for your store

Our LED lighting collection gives light to furniture and shelving, suitable for every application from recessed to surface mounting, from wood to glass and metal.

We develop smart solutions, perfectly tailored to specific tasks, contexts, and purposes.

Our products are designed to enhance the visual and emotional experience inside your store.

A close-up photograph of a butcher's hands, wearing a white glove, selecting a piece of meat from a refrigerated display case. The case is filled with various cuts of meat, including what appears to be pork chops and ground meat, all neatly arranged in black trays. Price tags are visible, with one clearly showing '96.99'. The background is slightly blurred, showing a yellow wall with blue accents. The text 'SERVE OVER' is overlaid in the center of the image.
